Professional Practice

We at Gage-Tupper recognise the importance of an independent third-party Clerk of Works function on any construction project to help ensure the client's interests are protected on their investment.

A Clerk of Works will help by:

- certifying that the works are carried out to comply with the relevant statutory regulations and laws,
- that works are carried out to an exceptionally high standard of workmanship,
- that the quality of materials used in the construction are of suitable standard,
- leading to a reduction in defects with consequent savings in the rectification of these in ways that can facilitate timely completion.

Our Company was established in 1993 to specialise in providing Clerks of Works on a contract by contract basis, to construction projects throughout the United Kingdom. We are able to offer either a full-time resident or part-time visiting service for all types of work, including Building, Civil Engineering and Mechanical & Electrical Engineering.
